Subject: Application for RPA Developer

Bonjour,

Today, I find this opportunity and interested on the job position and immediately enthusiastic. I completed my Bachelors in the Computer science Engineering field in the year 2004 and started my career as a software developer at Accenture Solutions Pvt Ltd, India. I have 14.10 (~15) years of software development work experience in the Information Technology (IT) sector prior to joining MBA program in Paris. I worked as Senior Technical Architect with the key IT skills such as Robotic Process Automation, C#.net and C++ & Unix developer. I started my career in Accenture as a developer, worked for multiple US clients and domains (Banking, Mobile and Retail domain) on different development roles and multiple geography locations (both in India and in US). I have worked extensively with client team in US for 7+ years at BestBuy corporate headquarters, Minneapolis, US. I have greater work exposure in the largest US Financial Services - Bank of America (BoFA) - Viewpointe which provides content services and business process consulting including investments and trading along with my retail/supply chain experience.

I am eagerly looking for opportunity for the RPA Developer role with my previous work experience working with Enterprise Architect (EA) teams to design and build technical solutions for business requirements and continue to expand my roles in the technical and Financial field. I would like to apply into this open position and felt this position suitable to my interest and increase my research and development skills. Along with my technical skills I have strong leadership experience as a delivery at Accenture and successfully headed multi-million-dollar projects and managed multiple delivery teams including development, testing and support teams both at on-shore (US) and offshore (India). My strong communication, organizational and leadership skills helps as an excellent fit for the position.

I have completed my course in Master of Business Administration (MBA) with specialization in Digital Marketing Strategy and Data analytics at Paris School of Business (PSB), with my final project/thesis on AI & blockchain technologies on logistics and supply chain industry to bring in consumer transparency. In addition to my MBA program in the field of digital marketing and data analytics from business school, I have gained more knowledge in the field of ML algorithms, python programming, RPA UiPath and Blue prism and accredited with Technical and ROM Architect certification from the Blue Prism academy. As stated earlier, I am very much eager to work on the RPA Business Analyst role based on my IT experience and delivery of the projects on schedule and budget.

I am dedicated, highly approachable, sensitive to cultural diversity, enthusiastic and increase learning possibilities which expands organizational horizons. My technical, organizational and leadership skills with my in-depth knowledge of experience in Accenture as Technical Architect skills are valuable to the organization. I believe that with my experience across development and technical skills in RPA and in product development, quality assurance, and business client exposure at Bank of America helps to lead and deliver the projects in the organization. My 7+ years of on-site technical and leadership experience in US and ability to deliver successful solutions beyond the client expectations, created immense support and trust of my business users at BestBuy, US. With my 15 years of IT development expertise helps to successfully deliver projects and perform the duties of the given role.

I would be very thankful to you consider my application and would be available to the interview process to present my skills. I am reachable via the phone number and email address. Thank you for your kind assistance in this matter, your time and your consideration. Please feel free to contact me for any required details.

Thank You & Best Regards,
